FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 203

The application contains a single embodiment of the invention claimed, with reference to a standard document "Blu-Ray disc Rewritable Format, part 3: Audio Visual Basic Specifications, June 2002". Following PCT International Search Guidelines IV-1.3, Applicant was requested to provide a copy of that document, which was refused. Hence, since the description does not set forth at least the best mode for carrying out the invention claimed, required by Rule 5(a)(v) PCT, the invention is insufficiently disclosed, contrary to Article 5 PCT.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
